Jersey's Leading Provider
of Higher Education

www.highlands.ac.uk

UCJ is the leading provider of Higher Education in Jersey. Each year over 200 full and part time students choose to further their studies with us in Jersey, benefiting from small class sizes, inspiring teachers, work-based learning and the highest standards of pastoral care. In the last two years, student academic achievement far outstripped the UK average and the majority of graduates progressed to post-graduate studies or graduate-level employment.

Our strong partnerships with two of the UK's leading universities, Plymouth University and London South Bank University, award each degree we offer and enhance learning experience by providing academic guidance and quality assurance of our provision. We partner with over 100 professional employer organisations who provide extensive work placements for students, contribute to the design of new programmes, as well as support the continuing refinement of our existing provision.

This year sees the launch of an exciting new degree in Psychology and Criminology, developed in response to demand from local students, whilst work continues behind the scenes to create several more new degree programmes over the next few years. As our community grows, students are taking part in a range of extra-curricular activities, such as trips to New York and China, social activities and attending conferences.

In partnership with the student community, we aim to keep doing what we do best, providing enriching learning at a higher level for the island's community. We look forward to welcoming you to UCJ.

which degree?

FdA/FdSc (Foundation Degree)

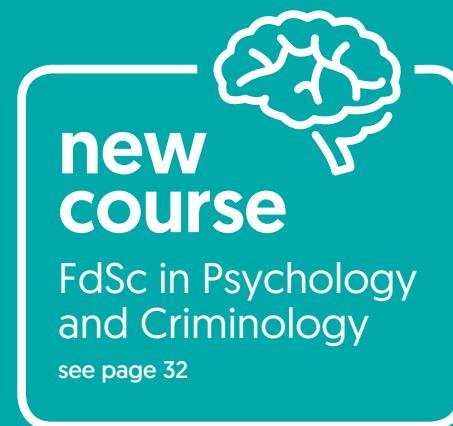

A foundation degree is a Level 5 stand alone qualification usually delivered in 2 years full-time or 4 years part-time. All of our foundation degrees combine academic study with work placements. Designed in association with employers, they are qualifications to equip you with the relevant skills, knowledge and understanding to achieve academic results as well as improve performance and productivity in the work place. A foundation degree can be topped up to a full Bachelor's (BA/BsC Hons) degree with an additional year of full-time study.

BSc / BA (Hons) Degree

An honours degree is a Level 6 qualification designed to develop higher-level skills and understanding to work towards a career in management, research and academic pathways. All degree programmes have a strong practical element, and our links with industry partners ensure they are relevant to the professional world to improve your employability and success at the end of your course.

MSc (Master's Degree)

A Master's degree is a Level 7 qualification for those who have completed a full degree. It is an intense period of study, normally lasting 1 year full-time or 2 years part-time and includes both taught and research components (based on a thesis). Master's degrees are for those interested in an academic career or higher level employment such as senior management, directorship and those who want to develop their evaluative and critical-thinking skills in a specialist field.

academic partners

Plymouth University

Plymouth University is the largest university in the South-West of England and ranked 5th in the UK by the Times Higher Education Top 150 under 50 (a global ranking of the top 150 universities under 50 years old). Our long-term partnership with Plymouth University spans over 20 years and we are very proud that our students are awarded a degree from a university with global recognition and esteem.

London South Bank University

With a focus on vocational education and professional opportunity, LSBU has been delivering professional qualifications for over 120 years. The university specialises in delivering degree education to students already in work, placing them as the perfect partner for our part-time programmes in Construction Management and Human Resource Management. Degrees and Higher National qualifications have been delivered by LSBU at UCJ since 1999.

Northumbria University, Newcastle

Develop a career in a dynamic and diverse industry, gain the right skills, knowledge and competences to work in a global environment and receive help and advice from world-renowned professionals who have access

to state-of-the-art facilities and a network of experts across the globe. Working in partnership with Northumbria University, UCJ students who undertake a FdA in Sport & Management or Business & Management have the opportunity to complete a 1 year top-up programme to gain a BSc (Hons) Sport Management degree and study a further year to gain a Masters in International Sport Management.

Ascentis Awarding Organisation

Ascentis is an Awarding Organisation and Access Validating Agency and is our trusted partner for the Access to Higher Education qualification. Ascentis creates cutting edge qualifications for FE Colleges, Training Providers, Schools, Employers and many other organisations both in the UK and overseas.

Jersey International Centre of Advanced Studies

JICAS is an independent, non-profit institution that aims to promote and facilitate research for an international community of scholars and students. JICAS attracts internationally renowned academics, intellectuals and politicians to help raise the intellectual capital of the island of Jersey and elevate the island's standing within the global academic community.

future career opportunities

UCJ has some of the highest rates of graduate employment in the UK. This is due to the strong partnerships we have with local industry professionals who offer work placements to our students as part of their degree programmes. Focusing on linking theory based learning with practical application through work placements ensures students get a real understanding of how their degree will influence their chosen career path and we are proud to report that 95% of students graduating in 2016 were given firm job offers before they finished their course.

William
Parker

BA (Hons) Financial Services Graduate.
Supervisor, JTC Group, Cape Town
South Africa

I graduated in 2014 with a 2:1 BA (Hons) Financial Services and joined JTC at the same time. You realise how important the work placement becomes in terms of preparing you for work - it's a steep learning curve to go from studying on your own timetable to being expected to work 9-5. The work placement prepares you for this where you're faced with daily pressures and deadlines that come with it.

The knowledge gained from the degree has been highly relevant, after recently completing my ICOSA Diploma; 4 exams, all of which I had covered on the degree.

It was always my aim to work abroad which is why I chose JTC, due to their global presence. It's important to consider where your employer can take you rather than accepting the first offer that comes along, it took me 2 years to get the move I wanted, but I always knew the opportunity was there if I could prove I was capable. I work as a Supervisor, based in the Cape Town office, assisting with the implementation of the new operating model. I am responsible for the overseeing of Jersey clients which is distributed amongst a team of 4.

Adam
Vibert

BA (Hons) Business & Management Graduate.
Consultant, Greenlight
Jersey

I work as a Consultant at Greenlight, a specialist in business and technology transformation. Greenlight provides a wide range of services, from project management and business analysis, through to system selection and implementation. Currently I'm working across 2 different projects, managing a system implementation and supporting 2 process-improvement initiatives. These projects have required a number of different skills and techniques, from project management and completing documentation such as impact assessments, to analysis-based activities such as requirements-gathering and process-mapping.

There are some clear connections between the Business and Management degree and the job I do now. On a daily basis, I must have an awareness of change management tools and techniques, as well as displaying elements of leadership. Both featured frequently throughout the degree modules and were discussed at length in lectures. Undoubtedly the real benefit was the ability to put theory into practice during work placements, where I experienced how leadership and change actually works in practice. Ultimately this has given me an insight into things that work well and not so well, leading me to develop my own style.

support

when you need it

**As a UCJ student
we want you to be
happy, supported
and achieve
academic success...
in that order!**

Lynn Blakemore
Head of Pastoral Care

At UCJ, students frequently comment on the high level of academic and pastoral support provided by our team of highly experienced and qualified staff. Having access to the support you need, when you need it, can make all the difference to your learning experience and success. Not everyone will need it, but if you do, we are here to help. Starting university is a rite of passage but you are not expected to cope alone; there are numerous support systems in place to help you adjust to this transition.

Personal tutors

You will have regular tutorials with your personal tutor which will give you the opportunity to discuss your progress and resolve any emerging academic support needs.

Student support

Our Student Support service is confidential and can be accessed to support you with those problems that life can intermittently throw at you. If your circumstances suddenly change and you find yourself in financial difficulties we can also provide you with information about the student hardship fund. The most important factor for us is that students ask for help and don't allow challenging circumstances to be the reason for dropping out of their course.

Our support team are on hand to help with issues relating to finance, relationships, health and wellbeing. You can access student support by speaking to any member of the department or contact us in confidence to arrange a one to one session.

E ucadmin@highlands.ac.uk
T 01534 608526

Learning support

Our Learning Support service helps students who have a variety of needs, including dyslexia and medical conditions such as epilepsy, diabetes and depression. Some students have received a diagnosis when they start university, whereas for others, assessment is part of the service and we can advise if dyslexia, dyspraxia or similar conditions are suspected. We can then use this information to ensure that your learning experience at UCJ is both supported and inclusive.

Careers guidance

Work placements are offered with each degree course to give students a breadth of work experience, the opportunity to build their professional networks and gain essential employability skills and experience. As well as this, we have a dedicated Careers and Employability team who are available to discuss options, guidance and support with you. We are proud to note that 95% of students graduating in 2016 were offered firm job roles on graduating.

Mature students

We appreciate that for many students returning to study after a break in education can present its own set of challenges, including the juggling of commitments of home-life and perhaps giving up a salary. In recognition of this, you are allocated a personal tutor who is your first point of contact should you find yourself struggling with your course. In addition, we also run workshops on study skills which can include note taking, essay writing and time management, and have drop-in sessions where you can access additional support.

student life

The best aspect of my UCJ experience so far would definitely be getting the opportunity to travel to China for four weeks last summer after finishing my first year, where I stayed at a Chinese University, learnt Mandarin and walked the Great Wall of China.

Beth Rousseau, Year 2 Student

China Trip

Each summer, students have the opportunity to spend three weeks in China at two Partner Universities at Huzhou University in Zhejiang Province and the University in Beijing. Students learn about Chinese culture, Mandarin, society and business, local food and sightsee around each province. They get to practically learn how to make Chinese food, Chinese massage and martial arts and visit local Chinese families. Highlights are the Beijing Opera and visits to the Summer Palace, the Great Wall, Forbidden City, Tiananmen Square, Bird's Nest Olympic Stadium and Water Cube.

New York Trip

This biennial study trip is a highlight of the academic calendar at UCJ. The six day excursion takes in points of interest including the United Nations, UNESCO, Wall Street, the Federal Reserve Bank and the American Museum of Natural History. We also see a Broadway show, reach the top of the Empire State Building, enjoy a boat cruise to the Statue of Liberty and a basketball game at Madison Square Garden.

London Trip

First year students on Construction Management degree can undertake a residential week at London South Bank University. They receive tuition for their Research Project module and gives students a chance to engage with international students on campus. Students also access specialist science and material laboratories, enjoy a social evening with LSBU staff and go on a specialised site visit in London.

Fresher's week

Your student life at UCJ starts with Freshers' Week; an ideal opportunity to meet other students through fun and interesting activities, and is a chance for you to find out more about groups, societies and enrichment activities on offer during your time with us.

JICAS/UCJ University Lecture Series

JICAS and UCJ have partnered to present the University Lecture Series delivered by internationally acclaimed academics, intellectuals and politicians from the UK, Europe and North America. Its aim is to provide unique opportunities for student interaction, faculty discourse and community dialogue to explore frontiers of knowledge and facilitate thought-provoking debate.

Café Scientifique

These events offer a contemporary spin on the original Newtonian coffee house debate. Topics and speakers change but the venue and idea stays the same – an informal lecture, set in the informal surroundings of the pub, with a chance to discuss today's key issues.

Global Citizen

We're committed to creating a comparable university experience, including teaching students how to be a global citizen and think critically by showing them how to use these skills in real-life situations. This may be in the form of talks, presentations and external events on sociological, environmental and political topics affecting the world as a whole.

Postgraduate Research Seminars

These monthly events bring postgraduate students together in a supportive environment, creating an academic community on the island. The seminars allow students to present their research to their peers for review and discussion and encourage feedback and constructive debate.

how to apply

All applications can be made by downloading a form at this link on our website:

www.highlands.ac.uk/application-forms/

Once you have submitted your application and have met all qualifying entry requirements, you will be contacted directly and invited for interview and be advised on any further preparation for entry requirements relating to your course. This may be in the form of a presentation or some written work.

If you are unsure of anything or have any questions, contact us directly:

Access to Higher Education: Diploma in Humanities & Diploma in Science

1 year | Full time

Why choose this course?

- Enables students to gain Level 3 (A-level equivalency) qualifications
- Designed for students without the necessary requirements for degree-level study
- Intense, fast-track 1 year route to higher education
- 2 Access pathway options to choose from
- Prepares students for higher-level study in their chosen career path

What will I learn?

This programme is an intensive 1 year course, which is both challenging and intensive, condensing the content of a traditional A-level programme into one year. Learners should be prepared to commit time and effort to their studies in order to succeed. Offered in two Access pathway options: Diploma in Humanities and Diploma in Science; both designed to enable learners to progress onto a broad range of degrees.

Access with Diploma in Humanities

Includes the study of psychology, history and sociology, as well as developing important core academic skills such as critical reading and referencing, essay writing, using IT and preparing for examinations.

Access with Diploma in Science

Designed to encourage a spirit of scientific enquiry through exposure to the study and practice of hard science, such as chemistry, and soft science like psychology. Studies in biology will also help prepare students for further studies in nursing and related sectors of the medical profession.

How do I qualify?

Interview

- Students must demonstrate the potential to study at Level 3 (A-level)
- Students must have a desire to progress to higher education
- Student must have a clear understanding of how to achieve their HE goals, including routes to university

GCSE

Minimum Grade C or above in English Language, Maths & Science (depending on chosen pathway).

Where can I go from here?

Students have progressed onto degree courses at UCJ and humanities and sciences degrees at a number of UK universities. The Access course offers a sound preparation for degree-level study through a range of teaching, learning and assessment strategies.

Business & Management

BA [Hons] and Foundation Degree [FdA]

3 years | Full time • 2 years | Full time

Why choose this degree?

- Prepares learners for a fulfilling career at management level in a wide range of industries
- Exciting work placement opportunities in a range of industries including retail, hospitality, financial services and public sector
- Develop your professional network through dedicated work experience
- Higher potential for job opportunities offers on completion

What will I learn?

From the rudiments of business accounting to strategic decision-making, students on this programme experience the full diet of business skills. Modules align with the professional work placements and are fully supported by a dedicated mentor and personal tutor, encouraging students to apply and reflect on knowledge acquired in the classroom whilst in the work context.

work placements give you the opportunity to sell yourself to your chosen organisations

Emma Pannenberg
UCJ Graduate & HR Executive
Sanne

Success Stories

I decided to study the degree structure as learning in class is very different from learning in a practical environment. UCJ combines class study with work placements which was extremely beneficial to my development and career.

Work placements give you the opportunity to sell yourself to your chosen organisations. I found a natural enjoyment and passion for HR and decided to pursue this as a career. I wouldn't have had this opportunity without the work placements. Studying with UCJ improved my confidence and skills, gave me opportunities to network in Jersey and ultimately resulted in me finding my current job and a career I love.

Financial Services

BA [Hons] and Foundation Degree [FdA]

3 years | Full time • 2 years | Full time

Why choose this degree?

- Prepares students for careers in technical or managerial roles in the offshore financial services sector
- Developed in partnership with leading financial services firms to ensure relevance & key skills are met
- Develop your professional network through work placement opportunities in leading financial services businesses in Jersey
- Higher potential for job offers on completion
- 3rd year top-up available for a full BA [Hons] degree (most students choose this option)

What will I learn?

You will gain a detailed understanding of the offshore financial services industry through case studies and real-world learning. Work placements are fully supported by a dedicated mentor and personal tutor, encouraging you to apply and reflect on knowledge acquired in the classroom whilst in the work context. Placements are paid, enabling you to earn while you learn. In common with the business and management programme you will also develop core knowledge and understanding to equip you to become a business leader of the future.

Recent graduates will commonly be supported through further professional learning with a range of awarding bodies.

UCJ has developed my knowledge and skills and provided fantastic placement opportunities

Thomas Williams
Year 1, Financial Services Student

Success Stories

I completed my BA (Hons) Financial Services at UCJ in 2013 and would thoroughly recommend this course to all individuals who would like to study towards a finance related degree. The degree provided great exposure to the finance industry through the work-based placement that allowed me to build the key transferable skills and behaviours required. The structured classroom lessons cover a variety of topics which enabled me to attain a broad knowledge across the finance sector as a whole. In addition, smaller class sizes gave me the opportunity to get a more personalised teaching experience and really get the most out of each lesson. The tutors were fantastic! This degree really helped me to get a job within the finance industry as I had both the knowledge and practical skills that employers look for. I am now working for Intertrust as a HR Resourcing Administrator and the knowledge I gained through my degree has been instrumental in my success.

Chloe Minson, BA (Hons) Financial Services Graduate. HR Resourcing Administrator at Intertrust, Jersey.

Information Technology for Business

Foundation Degree [FdSc]

2 Years | Full Time • 4 Years | Part Time

Why choose this degree?

- Acquire the knowledge and skills to become a creative technology professional
- Join one of the world's largest, dynamic and ever-growing business sectors
- High demand for technology professionals trained to the highest levels
- Learn the latest developments in the local technology industry
- Progress to a BSc (Hons) top-up year at a range of institutions

What will I learn?

This sector provides some of the most rewarding challenges and opportunities for an individual throughout their career. The course focuses on establishing critical understanding of technology strategies for business, developing industry-recognised knowledge and skills to implement new technology solutions for business, producing a culture of innovation and creativity that exploits technology for competitive advantage.

Students enter roles in IT strategy and support in business across a range of sectors, from financial services to consulting. Students can progress to a top-up year at a partner institution for a full BSc (Hons) degree.

We hope to offer this 3rd year top-up at UCJ for September 2018.

the work placement was a great way to begin building a career

FdSc IT for Business Graduate

Success Stories

By 25, I'd completed the Level 3 BTEC Extended Diploma in IT and loved every minute of it, so when I was told about the IT Business degree and it was available here on-island, I was extremely interested. What really swayed it for me was the Work Placement element as it would be a great way to see exactly what was on offer and hopefully build a career from it. I'm very proud to have found my specialism and career all at the same time. I joined C5 Alliance in 2014 on a Work Placement and have never looked back. Currently, I am a Consultant in the Technical Solutions Team. I really can't thank the UCJ staff and my employer enough for their patience and guidance which helped me forge the path to where I am today!

Tony Bechelet
Programme Leader

Where can I go from here?

CIPD Membership - The programme aims and objectives are constructed in line with the CIPD Level 7 advanced professional standards and provide knowledge required for a professional level of CIPD Membership. On successful completion, students automatically achieve Associate Membership of the CIPD and depending on the level of experience, can apply for Chartered CIPD membership.

Psychology and Criminology

Foundation Degree [FdSc]

2 years | Full time • 4 years | Part time

NEW FOR 2017

Why choose this degree?

- If you wish to pursue a career as a practicing Psychologist, Psychotherapist, Criminologist, researcher or in a range of related professional disciplines
- The first and one of its kind in Jersey
- Developed in partnership with the School of Psychology and the School of Law, Criminology and Government at Plymouth University
- Gain strong suite of transferable skills and experience to increase employability in chosen area
- Progress to a final year of relevant BSc (Hons) subject after successful completion

What will I learn?

Designed with the professional support of police and probation services to provide strong local and vocational relevance, this course offers a rigorous discipline of core skills development, particularly in research methods with 60% focus on Psychology and 40% on Criminology. The course offers a full understanding of theoretical and applied issues that form contemporary debate. Modules cover all key areas of Psychology, with Criminology focusing on the causes of criminal behaviour and the treatment of offenders within England & Wales and local criminal

justice systems. You will learn what is known and not known, and come to appreciate how our present understanding of people and their behaviour is based on an empirical tradition that emphasises the dispassionate search for truth and its application.

Sophie Johnson-Mills, Year 2 Student on work
placement with Jersey Probation Service

Where can I go from here?

Students can progress to BSc (Hons) Social Sciences at UCJ, or BSc (Hons) Psychological Studies at Plymouth University.

Studying psychology gives you a broad range of skills that span both science and the arts and opens up opportunities with a wide variety of employers. Professions include clinical or counselling psychologist; educational psychologist, health or occupational psychologist, sport and exercise psychologist. A criminology graduate with critical thinking, analytical and communications skills, is attractive to employers inside and outside the criminal justice sector. Careers in criminology include Community Development worker; Police officer; Prison officer; Probation officer; Social worker; Youth worker.

Social Sciences

BSc (Hons)

3 years | Full time

Why choose this course?

- You're interested in the study of people in society and how they relate to each other
- Offers work experience to gain key skills and increase employability in key sectors
- Prepares you for further study in specialist areas such as social work, teaching etc.

What will I learn?

This course includes Sociology, Social History, Social Psychology, Globalisation, Criminology and Research methods which give you skills to undertake your own research in the final year of the course. It teaches a broad overview of how society is built, theories and perspectives that show how individuals relate to each other and institutions. The degree has been written to reflect the special features of Jersey's society and students have the opportunity to engage in work placements and undertake research for a local organisation.

students benefit from 1:1 dissertation supervision and high-levels of individual tutor support

Mary Ayling-Philip
Programme Leader

Success Stories

I chose Social Sciences because it's broad and versatile, as I didn't want to restrict myself to one field of career choice. I gained a first class in my dissertation and as a whole, found the degree interesting and am delighted I achieved 2:1. I'm glad I chose this degree as it sets you apart from other degrees on the island.

Georgina Singleton, UCJ Graduate

This degree allowed me to continue my part time job whilst I explored what direction I wanted to take as a career. Studying a degree on such a smaller scale allowed for a greater relationship with the tutors where a degree abroad would not be possible. I achieved first class in my dissertation about brand advertising on social media. I'm thrilled that I graduated with a 2:1 (Hons) and would highly recommend it to anyone interested in this area.

Childhood Studies

BA [Hons] and Foundation Degree [FdA]

3 years | Full time • 2 years | Full time

Why choose this degree?

- Receive an in-depth understanding of childhood studies from birth to 16 years
- Increase your knowledge, creativity and advocacy for young children and their families
- Option to study a third year BA (Hons) top-up year at UCJ or Plymouth University
- Exciting work placements provide key experience to increase your skills and employability

What will I learn?

Modules are designed to equip you to support children of all ages, with emphasis on the critical early years. Explore all areas of child development, build your skills in planning, carry out observations and research methodologies. You will also attend Professional Development sessions and create a portfolio to evidence your learning. Weekly work-placements are fully supported by a dedicated coach and personal tutor, encouraging you to apply and reflect on knowledge acquired in the classroom. You can achieve a 'Licence to Practice', allowing you to work with children in Jersey on completion of your work placement.

Programme Leader

Lynn Blakemore
T 01534 608535
E lynn.blakemore@highlands.ac.uk

Year 1 (FdA)

- Professional development
- Include me – Perspectives on disability
- Children's rights and welfare
- Today's child
- Understanding children's learning and development
- Provision for children

Year 2 (FdA)

- Children in society
- Physical movement in the lives of children
- Children's workforce – Management and leadership
- Child development is for the future adult
- Who am I?
- Multi-agency working and the impact on children

Year 3 (BA Hons)

- Honours project
- Consultancy in childcare
- Curriculum, planning and assessment
- Key issues in childhood and youth studies
- Strategic, operational and multi-agency management

Where can I go from here?

Students go on to a range of positions in the childcare industry, including management in the private sector, Family Nursing, Education and Day Care Registration. Many also continue studying for PGCE courses in the UK to become Primary Teachers.

Placements with us expose students to a variety of experiences, including shadowing our specialist support workers

Fiona Vacher, Executive Director
for Jersey Childcare Trust

Success Stories

Doing this degree enabled me to follow my aspirations of becoming a primary school teacher without moving away from home. The course offered creative assessment methods which to me, makes learning more enjoyable. I was course rep which enabled me to attend meetings with the staff and other course reps, to put forward my peers' feedback of the course. This helps the staff at UCJ improve it for following years but also gave me the opportunity to broaden my skill set. It's good to see how our opinions can help shape the course and that our voices are listened to within the institution. I've now gained a conditional offer to do my PGCE at Brighton University. I hope that these will be skills that I can bring back to the island.

Construction

Higher National Certificate (HNC) Diploma

2 years | Part time

Why choose this degree?

- If you work in the construction industry are seeking to further your career
- Gain an industry-recognised qualification
- Prepares you to progress to Construction Management, Surveying & Architectural Technology degree disciplines
- Develops your knowledge and skills to fulfil a range of technical and managerial work in the sector
- Prepares you for promotion and new career opportunities
- Increase your employability through the vocational approach to teaching

What will I learn?

You will learn about construction technology and materials, the legal and economic context, building services and environmental science, construction technology and structures, surveying and setting out, architectural design and technology and building pathology. You will also complete a project and be supported in classes that will help develop your academic skills for this level of study. With emphasis on managerial training, you will develop your ability to tackle and take responsibility for projects throughout the construction industry.

industry**

Tony Bechelet
Programme Leader

Where can I go from here?

The programme covers a range of construction industry pathways, including Project Management, Quantity Surveying, Structural Engineering and Construction Work. Many graduates progress onto the BSc (Hons) in Construction Management or the BSc (Hons) in Architectural Technology, either directly or after a study break. Studying Architectural Technology and Construction Management would be a useful route for various Surveying disciplines and provide strong career enhancement for more senior positions within the industry.

Construction Management

BA [Hons]

2 years | Part time

Why choose this degree?

- Qualify in an industry that's in high-demand for professionals
- Professionally accredited by the Chartered Institute of Building (CIOB)
- Develop skills to lead multi-disciplinary project teams
- Gain up-to-date knowledge of legislation and regulations
- Develop the ability to deliver in complex project environments

What will I learn?

The course provides you with a breadth of technical and managerial expertise in construction, preparing you to face exciting and demanding challenges within the industry. It offers the opportunity to use modern equipment within a well-resourced environment.

The knowledge gained enables you to have the confidence to work with other professionals in this exciting, fast-paced and competitive industry. Construction Management can be a fantastic career for those who love buildings, working with people and want to work in a professional capacity. This course will prepare you for a career in a range of fields within the building environment, including Project Management, Contracting, Consultancy and Residential building.

The course will enable you to develop a wide range of employability skills through the emphasis on a vocational approach to teaching.

Nathan Clothier
UCJ Graduate

Where can I go from here?

The course leads on to careers at a higher level within the construction industry. Graduates enter fulfilling careers in the local and international construction industry. You can further your studies with a MSc Construction Project Management off-island, or seek to gain professional membership of the Chartered Institute of Building.

Success Stories

Whilst living and working in Jersey with a young family I decided to add to my existing qualifications. This part time course gave me the ability to learn and further my career, whilst continuing to work full time. It was hard work but worth it. I'm now taking it one step further by applying for professional Chartered status with the Chartered Institute of Building. During the course my hard work was also recognised by London South Bank University by securing a scholarship from the Chartered Institute of Building and a top award from the Worshipful Company of Constructors.

Nathan Clothier
BSc (Hons) Construction Management
Graduate: First Class Honours

Architectural Technology

BA [Hons]

2 years | Part time

Why choose this degree?

- Prepares you for a career in Design and Architectural fields
- If you're seeking to become a qualified Chartered Architectural Technologist
- Accredited by Chartered Institute of Architectural Technologists (CIAT) and Chartered Institute of Building (CIOB)
- You have a passion for architecture, design, drawing and technology
- Develop a wide range of skills for employability

What will I learn?

Architectural Technology fuses the creative art of architecture with the scientific and technological aspects needed to make it a reality. It requires strong drawing skills, problem-solving abilities and attention to detail. As an array of software can be used on a daily basis, it's important to be IT literate. Architectural Technologists are specialists enlisted on architectural projects to translate designers' intentions into feasible development proposals. They are specialists in analysing the requirements and challenges of a construction project and applying the best fit technology, materials and processes. A fully qualified Chartered Architectural Technologist is qualified to manage construction projects from design through to build.

In partnership with

This course prepares you with design, technical and management skills, and teaches you to apply scientific principles and practical knowledge in constructing buildings to meeting building performance criteria. You will gain a sound understanding of advanced computer technology in 3D Computer Aided Design (CAD) software and visualisation in the production of design details, and knowledge of administering contracts and projects in fulfilling client and current regulation needs.

Year 1

- Theory of Architecture, Design & Conservation
- Measurement, Cost Planning & Tender Process for Architects & Building Surveyors
- Construction Contract Law
- 3D CAD & Building Information Modelling
- Architectural Design Procedures
- Property Inspection, Repair & Maintenance

Year 2

- Research Project Module
- Contract Administration [Non QS]
- Sustainable Construction & the Environment
- Architectural Design Project
- Architectural Design & Technology 2
- Architectural Practise Management

this course gave me the ability to learn and further my career

Dan Knowlton
First Class BSc (Hons) Architectural
Technology Graduate

Where can I go from here?

As the course is accredited by the Chartered Institute of Architectural Technologists, you'll receive exemptions against your Professional and Occupational Performance (POP) Record, needed to become a Chartered Architectural Technologist (MCIAT).

Although many graduates go on to be Chartered Architectural Technologists other options are available. Architectural Technicians are another popular route, but alternative career paths include working in Surveying and Town Planning.

Graduates can further their studies with a [Master's] MSc Construction Project Management or seek to gain professional membership of the Chartered Institute of Architectural Technologists and/or the Chartered Institute of Building.

Programme Leader

Tony Bechelet
T 01534 608612
E tony.bechelet@highlands.ac.uk

Success stories

I had a keen interest in architecture, but knew I was unable to go to university. I secured a job with Axis Mason Architects and enrolled on a 'BTEC National Certificate in Construction'. I continued with a 'HNC Diploma in Building Studies', at UCJ which I obtained a Double-Distinction. Working for a further year, I began the LSBU BSc (Hons) Architectural Technology Degree, which I completed whilst working full time, which gave me the ability to learn and further my career. Juggling work and study was hard but thoroughly worth it when I graduated with a First Class Honours Degree. I was awarded for Outstanding Graduate Student in Architectural Technology which was very humbling and a great way to finish my journey with UCJ.

Dan Knowlton, First Class BSc (Hons)
Architectural Technology

Sport & Management

BA [Hons] and Foundation Degree [FdA]

3 years | Full time • 2 years | Full time

Why choose this degree?

- Develop your professional qualification in the Sport sector
- Designed with industry relevance to reflect employment opportunities in this sector
- Work placements provide excellent experience for increased employability
- A multi-disciplinary qualification allowing varied career opportunities

What will I learn?

You will develop the knowledge and understanding necessary to build a successful career in sports development, sports education or sport and leisure management. With focus on business skills, you'll gain an understanding of the nature and meaning of sporting activity in people's lives, and of the planning and management of resources required to meet the leisure needs of their communities. Sport and management and other business sectors where management related theory, concepts and principals are integral are taught grounded in theory but with a strong emphasis on practical application. Work placements within the sport, leisure and education fields enable you to apply and reflect on your developing knowledge and foster professional networks which will enhance your employability.

Andrew McGinnigle
UCJ Sports Lecturer

Where can I go from here?

Students have been recruited into roles in leisure management, sport development, outdoor adventure, and some have trained further to become sport educators. Many graduates go on to complete their top-up year at Plymouth University, the University of St. Mark and St. John, or University of Northumbria, graduating with an honours degree. It's anticipated that students will be able to progress onto a top-up honours year at UCJ from September 2018.

Success stories

I decided to leave my degree in the UK as I wanted to study on-island so I could work as well as study. During my Sport Management degree I worked part time at Sports Development. This opened a job opportunity as a Sport Development Officer when I finished my course. We are currently re-branding as 'Jersey Sport' and I am moving into the role of Community Programme Officer which is the job I've always wanted to do. I'm now in charge of all community projects which is a fantastic opportunity for me.

Art & Design

Level 3 Certificate in Foundation Studies

1 year | Part time

Why choose this degree?

This one-year, Level 3 (A-level equivalent) course is designed for students who wish to further their study of Art & Design at university, or who are aiming for a career in the creative industries. It is mainly designed for learners who wish to study Art & Design at university but may not previously have had the opportunity to develop the necessary skills.

An exciting and practical part time programme which allows students to explore a wide range of media and techniques, the flexible design of the course makes it a favourite with mature students and school-leavers alike. All of the tutors on the programme are professional artists and designers and students have the opportunity to visit galleries and museums both on-island and in the UK.

Programme Leader

Sarah Jordan

What will I learn?

This course gives a strong grounding in a range of creative skills and disciplines, including, but not limited to: drawing, painting, printmaking, photography, ceramics, 3D design, textiles, fashion and sculpture. Students will gain a clearer understanding of their potential area of specialism prior to degree level study. Learning takes place in the creative surroundings of our art studios, where artists work side-by-side and are able to comment on and critique each other's work.
